

Communication regarding the administration of medications in schools

1. Administering medication at school

If your child requires staff to administer medication to your child at school, please contact the school office in the first instance to discuss your child's requirements.

Please note, school staff will only administer medication that:

- has been prescribed by a qualified health practitioner (e.g. doctor, dentist)
- is in its original container
- has an attached pharmacy label.

Office staff will ask you to complete and sign Section 1 of the *Administration of medication at school record sheet*.

N.B. If your child requires more than one medication, you will need to complete a form for each medication.

2. Requirements for students at risk of anaphylaxis

If your child is at risk of anaphylaxis, it is important for you to provide the school with your child's emergency medication and their ASCIA Anaphylaxis Action Plan, completed by your doctor. This Anaphylaxis Action Plan provides the instructions for the school to administer your child's medication in an emergency, which is specific to respond to their health condition.

If you have any concerns about your child's health condition, please contact the Principal.

3. Requirements for students at risk of asthma

If your child has asthma, it is important for you to provide the school with your child's emergency medication and their Asthma Action Plan, completed by your doctor. An Asthma Action Plan provides specific instructions for the school to administer your child's medication.

If you have any concerns about your child's asthma, please contact the Principal.

4. Providing medication to the school

Before you provide the school with your child's medication, check the expiry date to ensure it is in-date and there is enough for the agreed time period. It is also a good idea to take a note of the expiry date so that you can replace the medication before it expires.

Please note, school staff will not administer medication that you can buy over-the-counter at chemists and supermarkets (e.g. paracetamol, eye drops, cough syrup) unless it has been prescribed by your child's qualified health practitioner. For example, the school would administer paracetamol to a student only if it has been prescribed by their dentist to be taken for a short time after dental treatment.

School staff are bound by these regulations and we hope that all parents will acknowledge and cooperate with these rules.

It is safer for all students if you can provide medication to the school in person (rather than send medication with the student). If you can't provide the medication in person, contact the school to determine the easiest and safest approach for the school to receive the medication.

When your child's medication is no longer required to be kept at school, please collect all unused medication.

Thank you for your assisting the school in keeping our students safe and healthy.
